

# SECURE PAYMENT TECHNOLOGY

## 3D SECURE

## What is 3D Secure?

A subscription for 3D Secure password Verified by VISA/ MasterCard SecureCode.

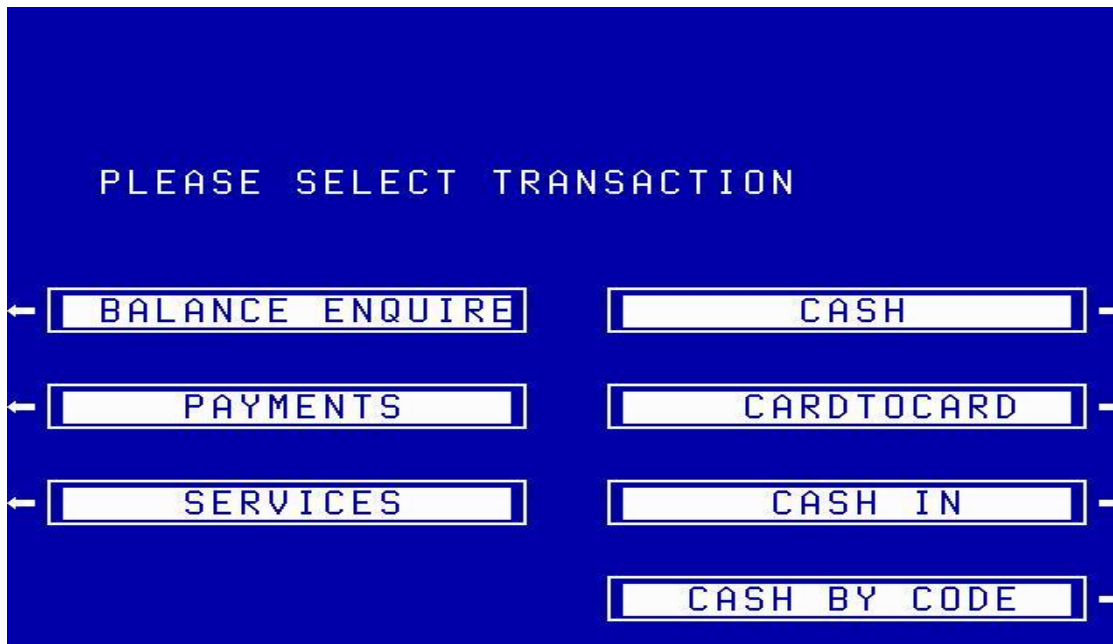

# What is 3D Secure?

3D Secure technology allows to purchase in the Internet in a safe mode. This means that even if card data lost or stolen nobody except the cardholder can make transaction in the Internet.

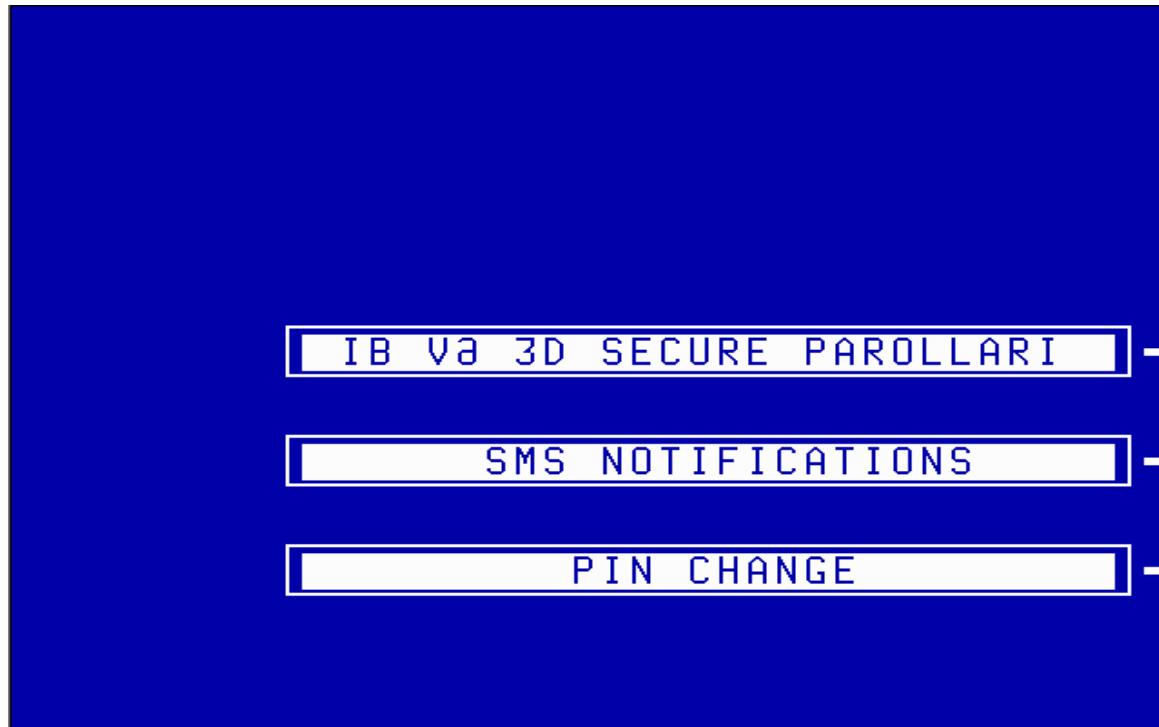

# 3D Secure passwords registration

There are two ways to connect: print one time password list from the ATM or get one time password by SMS (only for “SMS notification” subscribers). To print one time password list via ATM you must choose “Services”.

# 3D Secure passwords registration

Choose “IB&3D secure passwords”

# 3D Secure passwords registration

Then you will get the one time passwords list

***Protect Your Card Online***

Your card has been pre-enrolled in 3D-Secure to help protect against unauthorized use online.

Once your card is activated, your card issuer will ask for your 3D-Secure password whenever your card is used at participating online stores.

**If you know your enrollment password, please enter card number and click Activate.**

Card number :

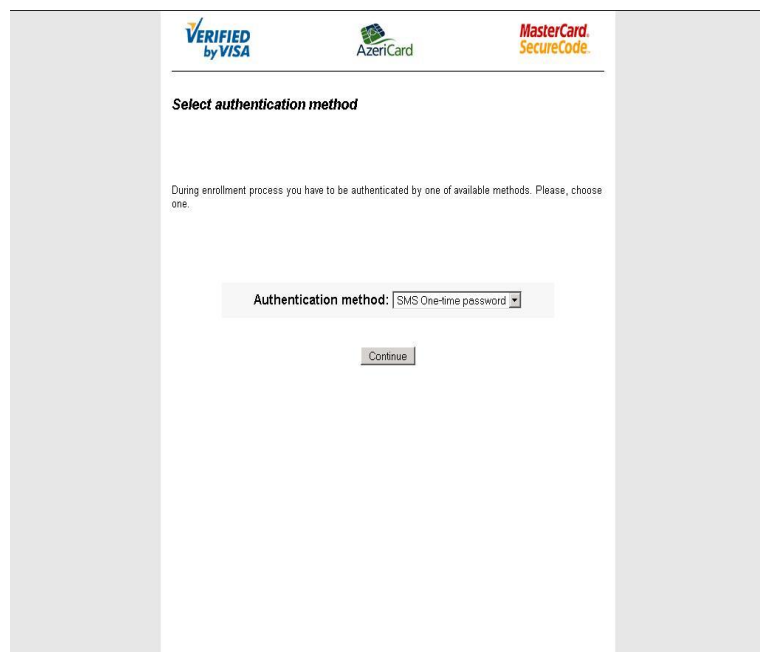

# 3D Secure passwords registration

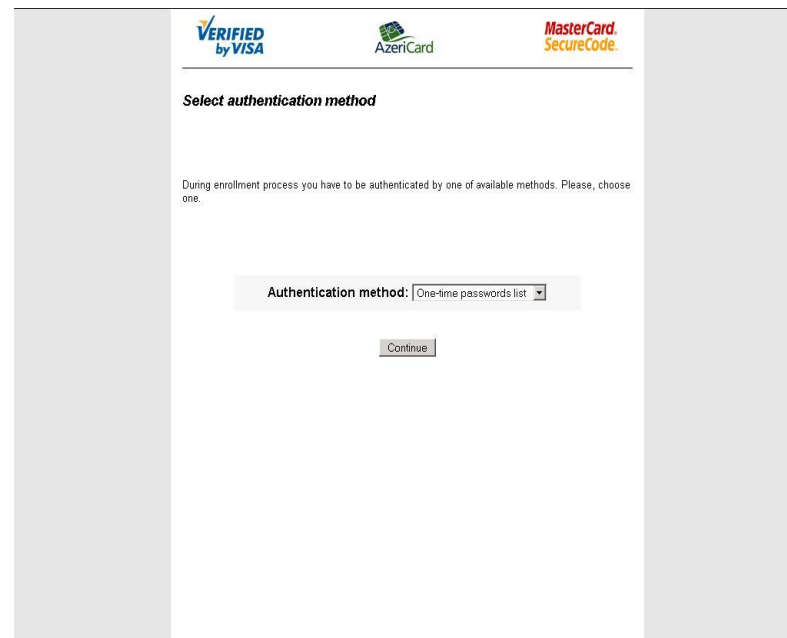

Select authentication method:

SMS one time password

One time password list from ATM

The screenshot shows the 'Select authentication method' screen. At the top, there are logos for 'VERIFIED by VISA', 'Azercard', and 'MasterCard SecureCode'. Below the logos, the text reads 'Select authentication method'. A smaller line of text says 'During enrollment process you have to be authenticated by one of available methods. Please, choose one.' In the center, there is a dropdown menu labeled 'Authentication method:' with 'SMS One-time password' selected. Below the dropdown is a 'Continue' button.
